Supervisory Patent Examiner, Art Unit 2185

/Yaima Campos/ Examiner, Art Unit 2185 Continuation of 11, does NOT place the application in condition for allowance because:

The scope of 1-3, 5-8, 10-22 and 25-26 has been changed (by amendments presented to claims 1, 7, 10, 13 and newly added claims 25-26). These limitations require further consideration and/or search by the Examiner. For example, independent claims 1 and 10 have been amended to define "...failure boundaries being determined using error correction group..." wherein previsouly, failure boundaries were defined as "... failure boundaries being determined using at least one of error correction group and controller group information..." (note that prior art teaching only "controller group information" and is an area of the claims have now redefined failure boundaries as being determined using "error correction information"). Dependent claims 25-26 recite new limitations. Thus, the presented claims require further search and consideration by the examiner.
